Description

Based on our Nessum Dorma blend, we have broadened our product appeal with the introduction of a range of retail and wholesale pods, which allow a far wider enjoyment of true espresso coffee in many more environments.

We individually package each of our pods in a single dose, nitrogen flushed, double film sachet to ensure ultimate freshness and quality. This process, one of the most expensive and advanced, guarantees conservation of the natural aromas and properties of the coffee pods and prevents oxidation right up until the moment of consumption.

Designed for speed and consistency, our pods are easy, fast and make no mess!

Code	CFN800	CFPD850	CBP600	CBPD650

Case Unit	27 x 25 Pods	27 x 25 Pods	6 x 150 Pods	6 x 150 Pods

Machine Compatibility

Antica Tostatura Triestina retail pack espresso pods can be used at home with all E.S.E. (Easy Serve Espresso) compatible espresso machines.

Our wholesale espresso pods are designed for use by professionals in coffee shops, restaurants and most other retail environments. They are compatible with most traditional commercial espresso machines (may require a pod adapted portafilter handle).
